What is the ZQ600 Plus Series Mobile Printer?

Maximum productivity, ease of use and manageability

Want to improve productivity and customer service, and at the same time reduce labeling errors? With the ZQ600 Plus Series you can. Advancing Zebra's popular QLn platform, the ZQ600 Plus Series adds advanced technology—including Wi-Fi™ 6 and RFID*—and innovative design that drive productivity, ease-of-use and manageability to a new level. This premium mobile printer offers a large color display, the latest Wi-Fi 6 (802.11ax) and Bluetooth® 5.3 wireless connections**, class-leading battery technology for full-shift power and powerful remote management tools.

ZEBRA

Why should you buy the ZQ600 Plus Series?

Top 5 Customer Benefits

1
Fast connections and a future proof platform.

Zebra printers are known for leading the market in wireless technology. The industry's first Wi-Fi 6 mobile printer, the ZQ600 Plus Series offers WPA3 security, faster and more reliable connections and enhanced roaming. They also support industry standard 802.11r fast roaming, so your staff can always depend on a connection. Bluetooth 5.3** provides wider range and faster transmit speeds. For flexibility, choose between 802.11ax/ Bluetooth 5.3 or 802.11ac/ Bluetooth 4.2 dual radio options, depending on your network environment.

2
All the power you need.

Simply put, when you choose the ZQ600 Plus Series, you get a better battery. The smart PowerPrecision+ battery is one of the highest-capacity batteries in its class—33% higher than the QLn Series—powering every minute of the longest shifts. And that's not all. You get a wealth of battery metrics to better manage your batteries. Our Power Smart Print Technology™ utilizes the exact amount of power required, reducing power consumption by as much as 30%—so your staff can do so much more on a single charge.

3
Zebra Link-OS® and Print DNA™ for unmatched value.

Zebra Print DNA applications, utilities and developer tools provide powerful new features that no other competitive product can offer—features that simplify everything from integration to day-to-day management. The ZQ600 Plus Series supports Link-OS and includes the PrintSecure utility that makes it easy to fine-tune printer security and create secure printer connections to protect sensitive data.

4
Ready whenever you are.

No one likes waiting for a mobile device to boot up during a shift—it's frustrating and adds time to every task. Your mobile phone is ready whenever you need it, so why not your printer? That's why we made sure the ZQ600 Plus Series is ready whenever you press print. Instant wake-up works on both Wi-Fi and Bluetooth—the moment a user sends a print job, the ZQ600 Plus Series wakes up and begins printing.

5
The right accessories to make your printers more productive.

With the ZQ600 Plus Series, you can choose from a broad range of accessories, including: 1-bay, 3-bay or 6-bay battery chargers to save space in the backroom; carrying options for added protection and single and quad-bay Ethernet cradles that enable easy remote upgrades and troubleshooting. You can even keep using the QLn accessories you have today for a cost-effective upgrade.
