

RPOLE30

30' Foot Equipment Mounting Pole

The R-Pole-30 is a versatile retracting universal mounting solution for Zebra Antennas and Radios including Snap and ATR Series Readers. Unit is constructed out of high strength extruded aluminum tubing featuring on-hand extension locking mechanisms. Locking mechanisms rated to 55 lbs.

The R-Pole-30 is a versatile retracting universal mounting solution for Zebra Antennas and Radios including Snap and ATR Series Readers. Unit is constructed out of high strength extruded aluminum tubing featuring on-hand extension locking mechanisms. Locking mechanisms rated to 55 lbs.

- **Retractable, Heavy-Duty Design** - Constructed from high-strength extruded aluminum tubing.
- **Secure Locking Mechanisms** - On-hand extension locks rated to hold up to 55 lbs of equipment.
- **Universal Mounting Compatibility** - Pre-drilled plate supports Zebra Snap & ATR Series Readers and 100mm VESA mounting standard.
- **Flexible Equipment Positioning** - Mounting platform offers 360° horizontal rotation and 90° vertical tilt, locked with allen key set bolts.

The Top mounting plate features wide base for stability. Includes 5 3/8" stainless bolt that is retained to the base so that it does not slide out when installing to building structure. Ships with oversized fender washer, nut and nylon locking nut. Unique tube in tube extruded tube design prevents tubes from rotating inside of one and other. Safety cable and hardware included for mounting at top on building structure and equipment. Oversized cable access holes provided at top and bottom of assembly for cable routing.

SPECIFICATIONS

Model	Length	Section	Tube Thickness	Extended Length	Collapsed Length
R-POLE	30ft	6	1mm	9150mm (30ft)	1900mm (6.2 ft)
