WHAT IS THE ET51/ET56 WINDOWS ENTERPRISE TABLET?

The surprisingly rugged, thin and light tablet.

The ET51/ET56 offers the perfect blend of form and function. Some of the thinnest and lightest of Zebra's rugged tablet computers, the ET51 (WLAN only) and ET56 (WWAN/WLAN) provide workers with the same great styling they love on their personal tablet. And enterprises get all the business-class features they need to boost workforce productivity inside and outside the four walls—from a rugged design and daylight viewable display to advanced data capture options and a wide range of enterprise accessories.

ZEBRA

WHY SHOULD YOU BUY THE ET51/ET56?

TOP 5 CUSTOMER BENEFITS

1

Beauty *and* brawn.

With the ET51/ET56, you can have it all. These enterprise tablets are surprisingly thin and lightweight—some of the thinnest and lightest in Zebra's full line of rugged tablet computers. Users get the great styling of a consumer tablet with a bright, daylight-viewable display. But don't let their good looks fool you. Virtually nothing will stop the ET51/ET56. These rugged tablets are built to handle drops to concrete, rain, snow, dust, extreme heat, subzero temperatures, spilled liquids and even a hose-down at full force.

2

See all you need to see.

Choose the 8.4 in. model if device weight matters most and your application screens fit nicely on a smaller screen. If you need more room to display your information, the 10.1 in. model provides plenty of real estate—no scrolling necessary to move through your screens. No matter which screen size you choose, you get the high resolution (up to 2560x1600) and class-best brightness you need for easy reading indoors and outside, even on sunny days.

3

More ways to capture more types of data.

You've got a choice of two optional enterprise-class scan engines for the lightning fast capture of virtually any 1D/2D barcode—regardless of condition. The 8 MP rear camera captures detailed photos to document proof of condition and more, while the front camera enables video calls for better collaboration.

4

A workhorse that never needs time off.

If there's no room for downtime in your operations, the ET51/ET56 delivers. The removable battery ensures the tablet never needs to be taken out of service just to charge. The ultra-low power processor minimizes power consumption, so workers can do more on a single charge. And if you're looking to power the longest of shifts, just add a second optional hot-swappable battery via the innovative expansion back for around-the-clock use.

5

Accessorize to make your workers more productive.

With an unmatched enterprise accessory family, you can create the perfect tablet solution for your needs. The Unique ShareCradle provides a common base to charge all your Zebra mobile computers and tablets. There are vehicle cradles for trucks and forklifts. A docking station provides desktop connectivity with USB, Ethernet and HDMI. The rugged frame nearly doubles the drop spec to 5.9 ft./1.2 m to concrete. And one flexible case provides your workers with three 'wearable' options.
