WHAT IS THE L10 ANDROID RUGGED TABLET?

The ultimate XPAD, XBOOK 2-in-1 and XSLATE 10.1 inch ‘go-anywhere’ tablets

Put the power of mobile data in the hands of workers in your most demanding environments with Zebra’s L10 Android Rugged Tablet family. Choose from three models that meet the needs of workers out in the field in oil and gas, mining, telecommunications, construction and the military — as well as in warehouses and manufacturing plants. The rugged go-anywhere design is at home indoors, outside, in snow and rain, sub-zero cold and blazing heat, mounted in forklifts and trucks, and even in bright sunshine.

WHY SHOULD YOU BUY THE L10?

TOP 5 CUSTOMER BENEFITS

1

Meet the needs of practically any job.

One versatile tablet family meets the unique computing needs of different workers. The XBOOK L10 is a laptop replacement with a rugged fully-functional keyboard for heavy data entry. Give your highly mobile workers the XPAD L10 with an integrated handle. And the XSLATE L10 is the smallest and lightest model for workers who need a traditional tablet design. No matter which model you choose, you get the same CPU platform, common user experience and consistent support for all your applications.

2

Far tougher than any rugged tablet in its class.

The L10’s rugged go-anywhere design is built for your harshest environments. Waterproof, dustproof and drop-proof, the L10 can be used in sub-zero cold and blazing heat, in forklifts and trucks. Its magnesium frame is stronger than steel, and lighter than aluminum! The capacitive touch screen works with fingers, gloves, even in rain and snow. And you can choose a daylight viewable or ultra-bright sunlight-viewable display to ensure workers can always see the data they need for the job.

3

Accessorize to make your workers more productive.

Create the perfect tablet solution with a broad range of mix-and-match accessories. Choose from different carrying options including a top handle, carrying case, shoulder strap, kickstand and rotating handstrap. Add a rugged backlit keyboard. Keep your tablets up and running with chargers, spare batteries and extended batteries. And we offer vehicle docks and industrial docks. No matter what models you choose, you get one enterprise-class accessory family that works with them all.

4

Mobility DNA for an unmatched feature set — and value.

Mobility DNA’s large family of applications make Zebra Android devices easier to use, easier to manage, easier to secure and simplify application development. For example, easily find misplaced devices with Device Tracker. View available Android updates and the update priority level for each device. Maximize the performance of your WiFi network. Easily stage devices for use — including Google Mobile Services (GMS). And much more.

5

A lifetime security guard for Android — only from Zebra.

Since 2011, Zebra has more experience with Android in the enterprise market than any other vendor. The L10 offers a long Android roadmap, along with LifeGuard for Android™, an industry-first security solution that extends the lifecycle of Zebra Android devices well beyond any consumer offering. Android rugged tablets minimize the number of operating systems you’ll need to support. And with Zebra’s platform approach, you get common applications, and management and development tools across devices.

MARKETS

- Warehousing and cold storage
- Telecommunications
- Manufacturing — Shop floor
- Oil and Gas
- Mining
- Field service
- Service bay
