1. To charge the main battery, connect the charging accessory to the appropriate power source.
2. Insert the MC33XX into a cradle or attach to a cable. The MC33XX turns on and begins charging. The Charging/Notification LED remains amber while charging, then turns solid green when fully charged.

## Charging Temperature

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.

## Charging the Spare Battery

1. Insert a spare battery into the spare battery slot.
2. Ensure the battery is seated properly.

The Spare Battery Charging LED blinks indicating charging. See [Table 6](#) for charging indicators.

**Table 6** Charging/Notification LED Charging Indicators
